

1  
2 **In the Claims**

3 Claims 37, 39, 47 and 51-53 remain in the application and are listed below.  
4

5 **1-36. Canceled.**  
6

7 **37. (Previously Presented)** An apparatus comprising an interactive  
8 television device configured to display a television program, wherein the  
9 interactive television device displays an interactive television mode  
10 indicator if the displayed television program supports an interactive  
11 television mode, the interactive television device activates the interactive  
12 television mode in response to a request from a viewer of the television  
13 program to activate the interactive television mode, and the interactive  
14 television device updates a channel status list to indicate that the television  
15 program is being viewed in the interactive television mode, and wherein the  
16 interactive television device includes at least one video tuner to tune the  
17 displayed television program and a plurality of data tuners to maintain an  
18 interactive state of multiple channels.  
19

20 **38. Canceled.**  
21

22 **39. (Previously Presented)** An apparatus comprising an interactive  
23 television device configured to display a television program, wherein the  
24 interactive television device displays an interactive television mode  
25 indicator if the displayed television program supports an interactive

1 television mode, the interactive television device activates the interactive  
2 television mode in response to a request from a viewer of the television  
3 program to activate the interactive television mode, and the interactive  
4 television device updates a channel status list to indicate that the television  
5 program is being viewed in the interactive television mode, and wherein the  
6 interactive television device includes a video tuner to tune a current  
7 television program and a plurality of data tuners, wherein each of the  
8 plurality of data tuners maintains an interactive state of a television  
9 program previously activated in the interactive television mode.

10  
11 **40-46. Canceled.**

12  
13 **47. (Previously Presented)** One or more computer-readable media  
14 having stored thereon a computer program that, when executed by one or  
15 more processors, causes the one or more processors to:

16 display a video program;

17 display an interactive video mode indicator if the displayed video program  
18 supports an interactive video mode, wherein a video tuner tunes the  
19 displayed video program, and wherein separate data tuning devices  
20 maintain an interactive video status for each video channel;

21 activate the interactive video mode in response to a request from a viewer  
22 of the video program to activate the interactive video mode; and

23 update a channel status list to indicate that the video program is being  
24 viewed in the interactive video mode.

1       **48-50. Canceled.**

2  
3       **51. (Previously Presented)** An apparatus comprising an interactive  
4 television device configured to display a television program, wherein the  
5 interactive television device displays an interactive television mode  
6 indicator if the displayed television program supports an interactive  
7 television mode, the interactive television device activates the interactive  
8 television mode in response to a request from a viewer of the television  
9 program to activate the interactive television mode, wherein the interactive  
10 television device updates a channel status list to indicate that the television  
11 program is being viewed in the interactive television mode, and wherein the  
12 interactive television device includes a video tuner to tune the displayed  
13 television program, and further includes a plurality of tuning devices to  
14 maintain an interactive television status for each channel.

15  
16       **52. (Previously Presented)** An apparatus comprising an interactive  
17 television device configured to display a television program, wherein the  
18 interactive television device displays an interactive television mode  
19 indicator if the displayed television program supports an interactive  
20 television mode, the interactive television device activates the interactive  
21 television mode in response to a request from a viewer of the television  
22 program to activate the interactive television mode, wherein the interactive  
23 television device updates a channel status list to indicate that the television  
24 program is being viewed in the interactive television mode, and wherein the  
25 interactive television device includes a video tuner to tune a current

1 television program and a plurality of data tuners, wherein each of the  
2 plurality of data tuners maintains an interactive state of a television  
3 program previously activated in the interactive television mode.  
4

5 **53. (Previously Presented)** One or more computer-readable media  
6 having stored thereon a computer program that, when executed by one or  
7 more processors, causes the one or more processors to:

8 display a video program;

9 display an interactive video mode indicator if the displayed video program  
10 supports an interactive video mode;

11 activate the interactive video mode in response to a request from a viewer  
12 of the video program to activate the interactive video mode; and

13 update a channel status list to indicate that the video program is being  
14 viewed in the interactive video mode;

15 wherein a video tuner tunes the displayed video program, and wherein a  
16 separate data tuning device maintains an interactive video status for each  
17 video channel.  
18

19 **54-59. Canceled.**
